

DEIONISATION

- A complete range of mixed-bed resins specially formulated and prepared for the deionization of water in EDM machines
- With regenerable or non regenerable mixed-bed resins, consisting of strong acid cation and strong base anion exchange resins, you can achieve and obtain very high quality deionized water
- High quality, ready to use mixed-bed resins offer many additional hours of machine service life and reduce downtime required for frequent resin changes
- They offer optimum mixture, high operating capacity and low operating costs
- Optimal performance to guarantee the production of ultra high purity water

Packaging

Reference	Designation	Resin type	Content
951-001-006	Resin bag 10 liters MB 46	MB 46	10 l
951-001-009	Resin bag 25 liters MB 9	MB 9 L	25 l
951-001-010	Resin bag 25 liters MB 20	MB 20	25 l
951-001-011	Resin drum 50 liters MB 9	MB 9 L	50 l
